with Autism and their families feel safe, respected, supported and a place of  
learning and mutual growth.**

## About Autism

**Autism spectrum disorder (ASD)** is a complex developmental condition involving persistent challenges with social communication, restricted interests and repetitive behavior. While autism is considered a lifelong disorder, the degree of impairment in functioning because of these challenges varies between individuals with autism. One in 36 children are being diagnosed with autism now. No cure exists for autism spectrum disorder, and there is no one-size-fits-all treatment.

The goal of treatment is to help maximize your child's ability to function by reducing autism spectrum disorder symptoms and supporting development and learning. Early intervention during the preschool years can help your child learn social, communication, functional and behavioral skills. As they grow, they need vocational training and require lifelong therapies to support and care.

## What do we do!

Go beyond Autism Centre provides therapies and skill training to about forty Neuro diverse children and it operates from Monday to Friday 09:00 am to 05:00 pm and on Saturday 10:00 am to 03:00 pm.
